

# QUICKSCREWS INTERNATIONAL CORP.

ISSUE 9

[www.quickscrews.com](http://www.quickscrews.com)

## Why Quickscrews?

Founded in 1987 as a local wholesaler of products for the cabinet and furniture trades, Quickscrews International Corporation has evolved into the supplier of the most popular brand of fasteners in the industry. Quickscrews has become recognized as a leader in both Quality and Performance. Goods are able to arrive anywhere in the country within 4 days due to optimal warehouse locations in California and South Carolina. Our highly trained and experienced personnel are ready to discuss your needs and concerns to ensure you get the product you need when you need it.

## Using Technology to Handle Customers Large to Small

Quickscrews continues to use technology to service many different categories of customers. Whether you are a weekend warrior looking to finish your latest project or you are a large commercial cabinetmaker, Quickscrews is prepared to handle your challenges and service your needs. If you are a wholesaler looking to add a profitable screw line or simply trying to support your local customers, we are recognized as having the best custom wholesale program in the country.

## Quickscrews Goes Online

In 2010, we began the process of marketing direct through our Website. Our customer base has expanded rapidly while continuing to develop more tools for our wholesale distributors. Although these two results seem opposite in nature, they actually go hand in hand quite well. Distributors, manufacturers, wholesalers and DIY weekend warriors have all been benefactors of our change and growth. We can now service easily over 10,000 customers and we ship all orders within 24 hours of receipt.

## Great Employees Make Great Companies

Good companies are forced to change. Great companies embrace it. Employees at Quickscrews work tirelessly to maintain Quickscrews' superior reputation while adapting to the change that comes with growth. We understand that while we grow, we must not forget that stability has been a key to our success. Greg Wiener, Quickscrews founder, has been at the helm since 1987 when he started the business in his garage in San Mateo, California. His philosophy has been to provide employees the opportunity to grow with the company and promote from within. Over 50% of our employees have been with the company longer than 10 years, and 3 of them have been "lifers," with the company for more than 28 years.

## Multi-Generation Family Business

Greg's sons, Jared, works at the company as well as his wife, Deborah, who has been working alongside and supporting Greg since the beginning. The Wieners are very proud that the next generation will be here to continue the dream that started so long ago. The Wiener family, along with the Quickscrews family, wants all of our customers and vendor partners to know how grateful we are for your loyalty and business over the years.

## 30 Years in the Making

Looking back, Mr. Wiener says: "After almost 30 years, I still love to get up and come to work every day. I wouldn't trade it for anything. If I had to do it all over again, I would. Quickscrews has been my life. One day the next generation will make it theirs."

## CABINET ASSEMBLY SCREWS

Quickscrews full line of Assembly Screws is the perfect solution for assembling cabinets or furniture made from soft woods, hardwoods, or melamine.

The original Quickscrews design has Coarse Thread for extra holding power and is heat-treated for added strength. The Type 17 Point allows for quicker starting, while Nibs under the Head help the screw to countersink and sit flush.

The Quickscrews Double Type 17 Point Screws are best for working with hardwoods while the Funnel Head Screws are best for melamine.

The line of Quickscrews Assembly Screws are available in a wide range of sizes, drives, and finishes.

The Funnel Head is ideal for woods where splitting is common.

The Spiral Thread eliminates splitting and the need for pre-drilling.

The Double-Serrated Head helps the head sink flush with no chipping.

## EXTERIOR DECKING & FENCING SCREWS

Quickscrews Exterior Decking and Fencing Screws are for use with decks, fences, or other outdoor furniture.

The Exterior Screws have a 2,000 Hour Ultra Guard Coating to protect against ACQ treated lumber. This coating underwent a salt spray test and withstood rust for 2,000 hours, allowing you to build an outdoor oasis that will withstand time and weather.

These screws also have a Quickcutter Double Type 17 Point with extra Coarse Thread to minimize pre-drilling, allow stress-free faster driving, greater holding power, and reduces splitting.

### ULTRA GUARD CORROSION RESISTANCE

**ZINC PLATED**

**ULTRA GUARD**

The Ultra Guard Coating's corrosion resistance is tested using a salt spray test.

The Screw is continuously sprayed with salt water and observed until the screw shows the first signs of red rust corrosion.

The more hours the screw withholds rust during the salt spray test, the more years the screw will last under normal, real-world applications.

For more information, check out our Corrosion Resistance Scorecard on our website.  
[www.quick screws.com/corrosion-resistance](http://www.quick screws.com/corrosion-resistance)

## CABINET INSTALLATION SCREWS

The Quickscrews Cabinet Installation Screws are used for installing any manner of cabinets into a variety of studs.

Our Cabinet Installation Screws are available with many different special features. Heads paints White or Sand seamlessly blend into multiple cabinet colors. Self-Drilling Screws that do not require Pilot Holes and can be installed into light, medium, or heavy gauge metal studs.

Furthermore, the QX<sup>2</sup> Installation Screw is the only Screw approved by the Woodworking Institute (WI) as a Multipurpose Install Screw.

## POCKET HOLE SCREWS

Quickscrews is the leading supplier of Pocket Hole Screws in the country. Our Pocket Hole Screws work with Kreg or Castle Jigs. The Modified Pan Head works with either application, while the Round Washer Head is primarily used in Kreg Style applications.

Pocket Hole Screws with Fine Thread are used in hardwoods, such as oak and maple. The Coarse Thread provides greater holding power in softer woods like particle board and melamine. The Hi-Low Thread is best for red oak as it reduces strip-out in the woods.

Knobscrews for attaching wooden knobs that do not include threaded inserts.

## ACCESSORIES

Quickscrews Accessory line covers a wide range of products.

Our Drive Bits come in plastic bags or plastic cases. We carry Standard Drive Bits as well as Impact Drive Bits.

Along with Drive Bits, we also carry a wide range of Bit Holders, Nut Setters, Drivers/Extensions, and Draw Bolts. Our Bit Kits feature a combination of our Drive Bits and Bit Holders in a range of drives.

We also supply attachments of Corian Sinks and Wall Anchors, as well as miscellaneous tools designed to make the woodworker's job easier.

V5 Represents Impact Drive Bits

Impact Drive Bits, made from V5 Alloy Steel, last 30-50% longer than standard drive bits. They are the strongest, toughest, and most wear-resistant bits in the Quickscrews product line.
